

Jordan Ellis

Senior Data Platform Engineer | jordan.ellis@example.com | github.com/jordan-ellis-example

Summary

Backend and data platform engineer with 8 years of experience building Python services, batch and streaming data pipelines, and internal developer tooling. Led a team of four engineers at Northwind Analytics.

Experience

Staff Data Engineer, Northwind Analytics (2021 - Present)

- Designed a Kafka and Spark Structured Streaming pipeline processing 2 billion events per day, reducing end-to-end latency from 15 minutes to 40 seconds.
- Built a Python FastAPI service layer over the data warehouse, used by 12 internal teams, and owned the on-call rotation.
- Mentored four engineers and introduced code review and testing standards (pytest, 85% coverage).

Software Engineer, Contoso Retail (2017 - 2021)

- Migrated nightly ETL jobs from cron scripts to Apache Airflow, cutting failed runs by 70%.
- Developed PostgreSQL schemas and query optimizations for order analytics.

Skills

Python, SQL, PostgreSQL, Apache Airflow, Apache Kafka, Spark, FastAPI, Docker, Kubernetes, AWS (S3, Glue, EMR), Terraform. Limited experience with Go and Rust.

Education

BSc Computer Science, University of Example (2013 - 2017)

Certifications

AWS Certified Data Analytics - Specialty (2022)
